Assignment 4

Create a one button app that can take the Geo Location of a device and send an SMS message to another device. Print a toast message to show the SMS message has been sent.

For this labs you can use a hard coded telephone # and Geo Location for testing.

```
#  Criteria
                      Total Points    Points Awarded

                         10                 XX
1. Program Specifications / Correctness
                          5
1. No errors, program always works correctly and
meets the specification(s).
2. The code could be reused as a whole or each
routine could be reused.
3. UI is user-friendly
2. Readability
                          1
1. No errors, code is clean, understandable, and
well-organized.
2. Code has been packaged and authored based on Java
Coding Standards.
3. Documentation
                          1
1. The documentation is well written and clearly
explains what
    the code is accomplishing and how.
4. Code Efficiency
                          3
1. No errors, code uses the best approach in every
case. The code is extremely
    efficient without sacrificing readability and
understanding.
2. Ability to correct exceptions is added in
exception handling class.
    Ability to log exceptions is added.
```
